Registration.

[From the Springfield Leader] We find considerable misunder-standing in many localities in regard to the registration law, many entertaining the mistaken opinion that those who are already registered are not required to do so again. The constitution of the State, invented by Drake and his Radical compeers gotten up for the object of surroundmany obstacles as possible, and keep people away from the polls, requires that "A new registration shall be made

within sixty days next preceding the tenth day prior to every biennial general election " In other words the Radicals have made it necessary to register every two years, causing a heavy expense to the State and a loss of time and

oney to the citizens. The registration has to close ten lays before the day of election and commence sixty days next preceeding the tenth day. The registration law requires the County Court to appoint days of registration within that time, and to give notice by hand bills, and through the newspapers at least ten days before the first day of registration. In many counties the time has been designated. Our County Court
